**ASX announcement
Media Release
14 July 2010**

CSG wins two prestigious Oracle[®] Partner Network Asia Pacific Partner of the Year Awards.

Australian owned and based ICT services company CSG (ASX:CSV) has received top honours from Oracle and been named Oracle Asia Pacific Applications Partner of the Year and Oracle Asia Pacific Identity Management Partner of the Year.

The awards recognise outstanding Oracle partners for their success in creating value for customers by developing and implementing innovative solutions based on Oracle technology and applications. The awards were presented at Oracle's annual Executive Partner Forum held in Macau this July.

"We are delighted to be recognised as Oracle APAC partner of the year in both the Applications and Identity Management categories reinforcing our position as one of Oracle's leading partners" says Julie-Ann Kerin, CSG Enterprise Services Group General Manager. "This is a great accolade for us and validates the quality of the projects we are doing in the Oracle space across the Asia Pacific Region. We are delivering many world class Oracle based solutions and it is fantastic to be recognised especially against such steep competition", she says.

Patricia Nance, Senior Alliances Director, Oracle Alliances and Channels, Australia & New Zealand, said: "Congratulations to CSG. They have demonstrated tangible success with Oracle's complete, open and integrated products and technology. Bringing innovation and excellence, they have delivered to our customers winning, proven solutions that solve their most critical business challenges. We thank CSG for their commitment and wish them greater success in the year ahead".

"We closed several high profile and long term Oracle based contracts last financial year in both government and commercial sectors and have more than \$100 million worth of Oracle based contracts in our pipeline for this financial year and expect this to continue to grow significantly as the new financial year progresses", says Julie-Ann. "Building our Oracle capability was a strategic companywide decision and will be a key contributor to us achieving our aggressive growth targets with some contracts expected to close in the next few months" she says.

CSG has capability to deliver solutions across the entire Oracle stack. One of the most high profile Oracle based projects CSG is currently delivering is the Ultranet: a world first online learning portal being rolled out for the Victorian Department of Education and Early Childhood Development to K-12 students at all Victorian government Schools. CSG was also recently awarded a seven year contract with the Victorian Department of Treasury and Finance to

For personal use only

implement and support a 600 user State Resource Information Management system (SRIMS).

Other significant Oracle wins for CSG include a contract with AJ Lucas to implement its new ERP system as well as a multimillion dollar project with IDP Education to implement a financial system to support its growth in more than twenty countries.

About CSG

CSG is an Australian owned publicly listed ICT services firm which employs more than 1500 people in Australia and New Zealand. CSG provides a complete and comprehensive portfolio of ICT services and solutions with offices in every mainland capital city.

CSG's client base is broad and ranges from large blue chip organizations and government to small and medium enterprise extending across a wide variety of industries.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit <http://www.oracle.com/partners>.
