ASX Announcement
CSG Ltd Announced Preferred Tenderer for Major Contracts in Northern Territory

ITC Company CSG Limited (ASX: CSV) subsidiary CSG Services Pty Ltd has been selected Preferred Tenderer for two major contracts with the Northern Territory Government (NTG), covering the provision of Desktop and Server Services and Network Management.

CSG will now enter further contract negotiations with the Government for these two packages.

While CSG has provided these services to the Government in the past as a subcontractor to other suppliers, CSG has now been selected as preferred tenderer as Prime. This selection reflects the scale, expertise and experience CSG has developed as a national IT Services company.

CSG has now also been engaged in non-exclusive contract negotiation for three other packages, covering the supply of Printers, Servers and Network Equipment, and as a sub-contractor in a fourth service package.

This cements CSG as one of the largest locally owned IT Service providers to governments around Australia. In addition to the Northern Territory Government, CSG is currently a service provider to the Governments in Queensland, Western Australia, South Australia, Victoria and also to the Federal Government.

Further details will be provided at the conclusion of the process.
