Media Release CSG Ltd to deliver Ultranet to Victorian Government Schools

ITC Company CSG Limited (ASX: CSV) has today signed with the Victorian Government to deliver the Ultranet, an online portal for P-12 students in Victorian government schools.

The Ultranet will deliver the award winning Oracle Student Learning portal to every Victorian government school at a cost \$47.5m over the first two years.

CSG will also provide ongoing support, including application hosting, software maintenance, disaster recovery and helpdesk services for an additional two years for approximately \$17.1m.

CSG's Education Lead and former Managing Director of Cinglevue Greg Tolefe commented "The software provided as part of the solution is the result of many years' collaboration between Cinglevue (acquired by CSG in October 2008) and Oracle's global Education practice. The solution is truly world class, and will support learning in all Victorian government schools"

CSG Ltd CEO Denis Mackenzie commented "This will be the first true enterprise solution deployed in P-12 education in Australia, and is one of the first systems in the world to offer such a high level of functionality to students, teachers, parents and administrators."

"This is also an exciting step for our business, as it represents our largest multi-year contract in the Enterprise Services division. I believe this will also open up significant opportunities in education around the country, where other states are looking to procure similar solutions"

"Despite the economic conditions, both our Managed Services and Enterprise Services divisions continue to grow their pipelines of potential multi-year contract opportunities"
